PROFESSIONAL SUMMARY

Innovative R&D Lead and AI Automation Engineer with over 10 years of experience bridging full-stack automation, data engineering, and intelligent systems architecture. Experienced in evolving legacy automation into autonomous systems using Agentic AI, RAG, self-healing, and CI/CD pipelines. Expert at managing cross-functional global teams, delivering high-impact R&D, and implementing scalable production-grade AI frameworks.

SKILLS

AI/ML & Orchestration: Agentic AI, RAG, Langchain, MCP, Text Embeddings
Automation & Frameworks: Robot Framework, Playwright, Selenium, TestComplete, Tosca, Katalon, RPA
Backend / Data Engineering: Python, SQL, FastAPI, Google BigQuery, ETL Pipelines, Data Vectorization
DevOps & Cloud: Docker, Jenkins (CI/CD), Git, GitHub, GitLab, AWS, Azure, GCP
IoT & Protocols: Zigbee, Modbus, ION Protocol, TCP/IP, Hardware Testbeds, webOS TV Board
Leadership & Management: Team Leadership, Agile/Scrum, Project & Resource Management, ROI, RCA & Problem Solving

WORK EXPERIENCE

LG Soft India **Bengaluru, India**
Senior Research Engineer (SDET Lead) *Sep 2024 – Present*

- Architected an LLM-orchestrated RAG system utilizing defect data embeddings for predictive module stability leading to increase in defect finding capability by 20%.
- Deployed local LLM in GPU server using Ollama and built browser extension to serve daily task in secure network leading to increase in daily work efficiency by 40% for validation team.
- Jointly delivered an AI-driven exploratory navigation tool with global team to speed up runtime testing via predictive UI interaction models, increased object detection accuracy from 53% to 91%.

Comviva Technologies **Bengaluru, India**
Senior Technical Lead *Jul 2023 – Sep 2024*

- Spearheaded a cross-functional product validation and automation team, implementing Agile strategies that streamlined delivery pipelines and achieved a 15% improvement in overall project delivery timelines.
- Implemented an automation framework with AI enabled self-healing technology to predict locator changes, resulting in a 50% reduction in maintenance rework, a 30% cut in testing time, and a 25% decrease in manual debugging through automated reporting dashboards.

Quest Global **Bengaluru, India**
Lead Engineer / Senior Automation Engineer *Sep 2020 – Jul 2023*

- Created a cross-platform data validation library to extract and validate Modbus data for 'Schneider Electric', decreasing regression time by 45 days across 16 devices and boosting efficiency by 30%.
- Leveraged CI/CD pipelines and TestComplete for Power Monitoring applications, resulting in a 40% reduction in manual script execution effort.

Foray Software Private Limited **Bengaluru, India**
Senior Software Test Engineer *Jun 2019 – Jul 2020*

- Achieved a 40% reduction in regression time and a 25% increase in product efficiency by automating banking applications using Tricentis TOSCA and Rally for client 'World Pay'.

Juntrax Solutions **Bengaluru, India**

Software Automation Engineer *Jan 2019 – May 2019*

- Authored the design and deployment of an end-to-end automation framework (Python/Jenkins/Selenium), driving a 45% reduction in manual regression testing effort.

Vibrant Info **Bengaluru, India**

Testing Engineer *Oct 2017 – Jan 2019*

- Spearheaded the development of end-to-end testing processes and automation environments from scratch, achieving a 35% increase in product delivery speed by integrating Agile methodologies to optimize workflows and shorten feedback cycles.

Guru-G Learning Labs **Bengaluru, India**

Software Tester / QA Engineer *Jul 2016 – Oct 2017*

- Implemented product testing tools and validation processes from scratch for apps and websites, successfully reducing software bugs by 40%.

PROJECTS

- **Yulu Micro-Mobility Demand Analysis**: Analyzed critical demand drivers for Yulu's shared electric cycles by conducting exploratory data analysis and rigorous statistical hypothesis testing (t-test, ANOVA, Chi-Square), delivering data-backed optimization insights.
- **Local LLM Based Browser Extension**: Established a browser extension based on local LLM setup using Ollama to help in analysis, data extraction, browser window chat, and summarization of content within a secure network.
- **AI Based Auto-Recovery System:** Architected an Agentic AI Automation System for monitoring of execution events and real time recovery for execution failure of software as well as hardware using local LLM, RAG & MCP concepts.
- **webOS Platform Intelligence:** Designed & streamlined intelligent AI enabled test automation tool tasked with monitoring active lab testbeds & executions. Also built an Agentic Recovery System executing automatic recovery routines for hardware & software layer errors (network drops, board freezes, flashing faults).
- **Center of Excellence (CoE):** Established and managed a specialized R&D team using Automation, AI & Data Analytics and Visualization Tools (Power BI, Matplotlib, Seaborn, Grafana) to enhance knowledge pipelines and engineering outcomes.
- **EcoStruxure (Schneider Electric):** Deployed robust automation environment setups and comprehensive test frameworks with Python & Test-Complete for power monitoring tools, increasing testing productivity by 40% and reliability by 30%

EDUCATION

- **Master of Science (MS) in Data Science & Artificial Intelligence | Woolf University, 2026**
- **Master of Technology (M.Tech) in Computer Science | RGPV Bhopal, 2021**
- **Bachelor of Engineering (B.E.) in Computer Science** | RGPV Bhopal, 2016

ACCOMPLISHMENTS

- Selected for an on-site deployment to Magok and Pyeongtaek, South Korea, driving cross-border innovation and aligning technical architecture with global TV SDET Team.
- Project nominated for Annual Tech Innovation.
- Nominated for the Annual Innovation Award at Comviva for implementing an AI self-healing server with RPA.
- Promoted to Lead Engineer at Quest Global for developing critical Modbus device data extraction libraries.
- Received a direct LinkedIn recommendation from the CEO of Juntrax Solutions for successful end-to-end automation deployment.
